	Rebuilt	\$2,200	\$2,200	\$2,200
	Overhaul	\$1,800	\$1,800	\$1,800

Upfront price discounts of up to \$3,000 on a factory-new, rebuilt or overhauled engine.

Discounted according to the matrix above. Determined by the type of engine purchased and the heritage of the exchange engine core when it last shipped from the factory.

Factory-new, rebuilt or overhauled. Exchange engine core must not have been field overhauled since it last shipped from the factory.

Repairs that required separation or disassembly of a crankcase or crankshaft may restrict participation in this program.

Exchange engine core must comply with the Lycoming Engines exchange engine core policy as communicated in the latest edition of Lycoming Service Letter 250.

A purchase order for a replacement engine must be received from an authorized Lycoming Distributor within twenty (20) years of the date notated on the self-adhesive logbook entry sticker supplied with the exchange engine core when it was originally shipped from the Lycoming factory as a new, rebuilt or overhauled engine. Lycoming form number 777, 2481 or 2480 will also be notated on the sticker.

Exchange engine core values can be found in the current Lycoming Aftermarket Engines Price List in the "Select Exchange Engine Core" table.

The term "zero-time rebuilt" is used by Lycoming to describe a rebuilt piston engine. The definition is approved by the FAA, and is not intended to contradict any authorized manual, or any FAR or FAA authorized publication.
